## SITUATION SUMMARY

- ◆ Heavy pre-monsoon rains in Sri Lanka continues from 20th May 2018, have killed at least thirteen people, and more than 100,000 people are affected in 19 District as of today.
- ◆ Flooding and subsequent potential landslide threat has forced the evacuation of people in low-lying areas where four main rivers have reached flood levels, while four districts were on "red alert" for possible landslides.
- ◆ Spill gates of many reservoirs had to be opened across the island. NBRO has still given landslide threat to Ratnapura, Kalutara, Badulla, Kegalle, Kandy, Matale, Nuwara-Eliya, Galle, Colombo and Kurunegala due to earthslips, cut failures and rock falls.
- ◆ South-west monsoon still suppressed by the persisting wind circulations running until September.
- ◆ 125,954 people (32,136 families) have been affected (the Disaster Situation Report , DMC & National Disaster Relief Services Centre (NDRSC) at 1000 hours on 24rd of May 2018). NDRSC has provided 24.9 million cash allocations to the 12 District Secretaries to address the immediate needs of the affected populations.
- ◆ River water levels at many stations are gradually decreasing, in Kelani, Nilwala, Gin, Malwathu-oya, Maha-Oya rivers and some areas of Kalu river shows flood levels as of 24th May.

Ministry officials and other senior level officials from respective organizations, Military officers and District officials were presented at the discussion.

DMC is coordinating with Military agencies through its EOC for better response interventions and NDRSC is undertaking needs assessment at local levels, especially in safety centers. Recorded housing damages; full damages 43 and partial damages 3,225.

**FIGURE 01: Heavy rainfall received last 24 hours ending at 0830 hours on 24 May 2018**

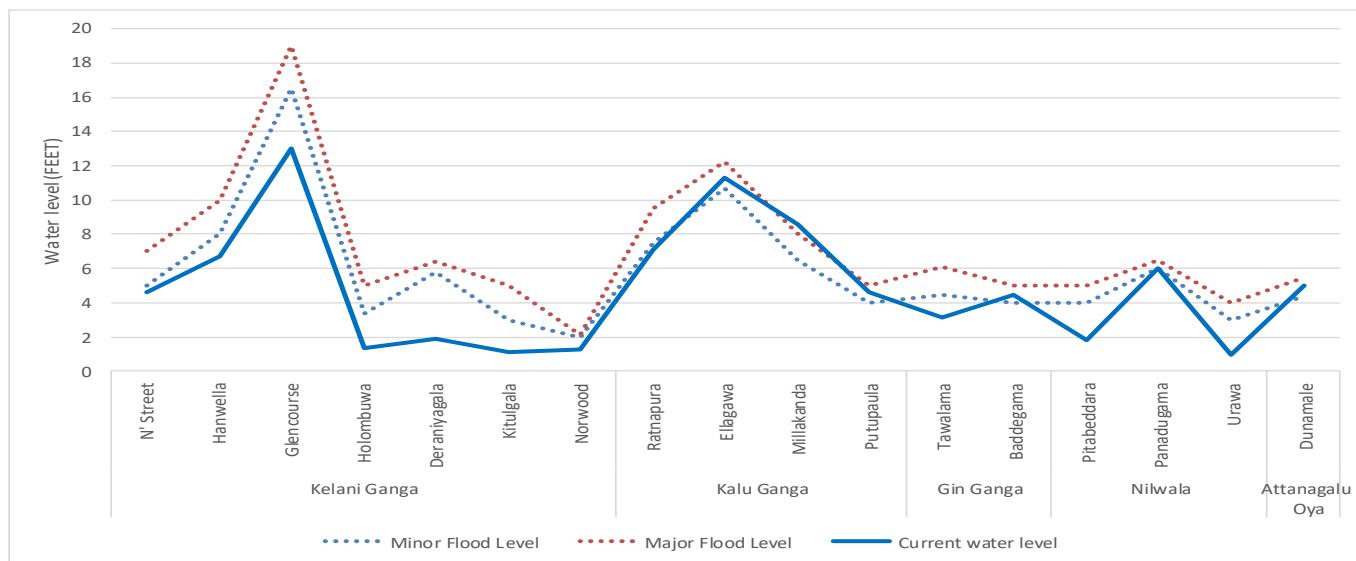

As a result of severe rains, 125,954 people (32,136 families) have been affected (the Disaster Situation Report , National Disaster Relief Services Centre (NDRSC) at 1000 hours on 24rd of May 2018). People at flood risk have been evacuated to safe locations and the total number of welfare centres. Approximately, 13,832 families have been evacuated into 251 welfare centres due to flood and landslide risks in 10 Districts. As of now 13 deaths were reported to the Disaster Management Centre.

Department of Irrigation has indicated that several major river levels are decreasing as of 24 May 2018, at 0900 hours which were at flood levels earlier.

However, the recorded rainfall was minimal in the major river catchment areas during past 24 hours ending from 8 30 hours of 24 May 2018. Therefore, the flood levels will fade away gradually.
